- Get specific training in its proper use.
- Become acquainted with its capabilities and limitations.
- Understand and accept the risks involved.

**FAILURE TO HEED ANY OF THESE WARNINGS MAY RESULT IN SEVERE INJURY OR DEATH.**

Only the techniques shown in the diagrams that are not crossed out and/or do not display a skull and crossbones symbol are authorized. Check our Web site [www.petzl.com](http://www.petzl.com) regularly to find the latest versions of these documents. Contact PETZL if you have any doubt or difficulty understanding these documents.

### 1 Field of application

Equipment and guidelines for a successful holiday season. These products and tips must not be used for any purpose other than that for which they are designed.

#### WARNING

Activities involving the use of this equipment are inherently dangerous. You are responsible for your own actions.

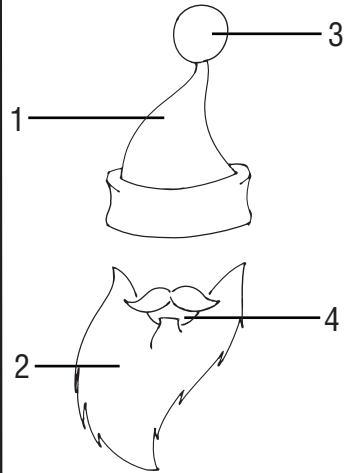

Before using this equipment you must:

- Read and understand all instructions,
- Get specific training in its proper use,
- Become acquainted with the reindeer,
- Have a belly like a bowl full of jelly.

Failure to heed any of these warnings may result in severe injury or death.

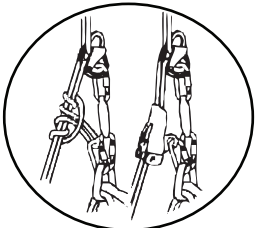

These instructions only describe the use of the pictured equipment and do not describe how to build toys, obtain a large workforce consisting only of elves, or how to reach every home on earth in a single night.

### 2 Nomenclature of parts

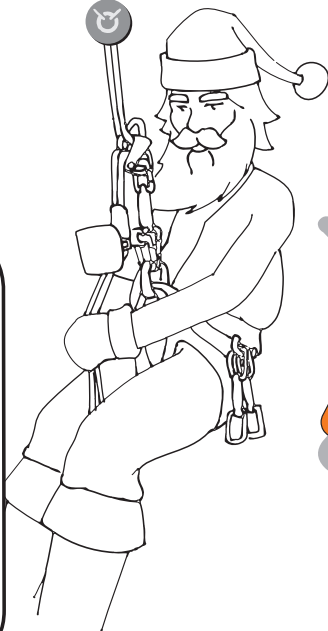

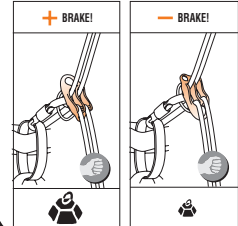

(1) Red hat, (2) Beard, (3) Fuzzy ball, (4) Mouth hole. Principal materials: polyester, felt, and joy.

### 3a Abseil descent

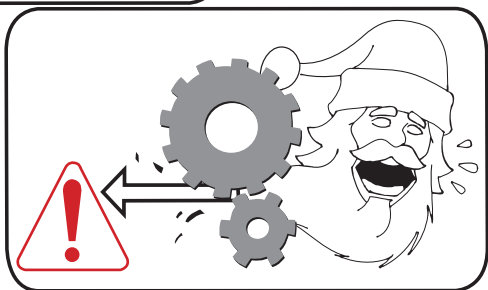

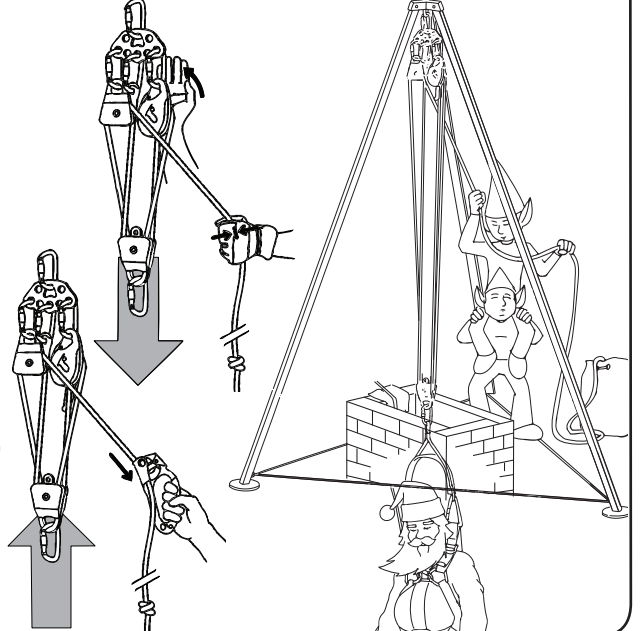

#### ADJUSTING THE BRAKE:

In most cases, choose the position: braking side of the rope running in the braking grooves. In other cases, adjust the braking position as needed for different user weights, rope diameters, applications and weather conditions. For less friction, reverse the rope path through the device. The braking side of the rope runs over the side of the device opposite the braking grooves.

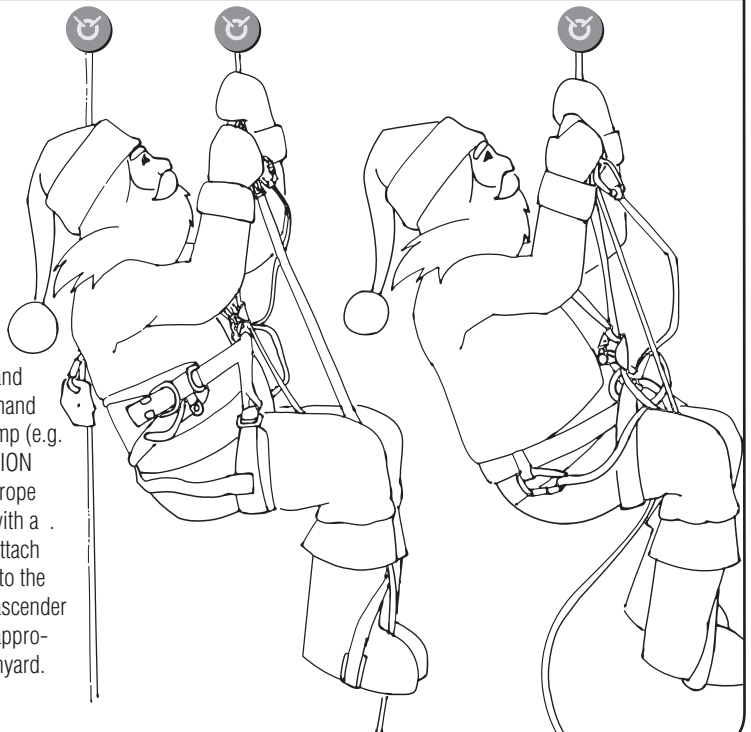

### 3b Confined space lowering system

### 4 Sustenance

### 5 Ascending the rope

Use the CROLL and another hand rope clamp (e.g. ASCENSION handled rope clamp) with a . Always attach yourself to the second ascender with an appropriate lanyard.

### 6 General instruction
